- Accepts bottles up to 1 gallon - compatible with common adhesive packaging sizes
- Disposable fluid path for easier product changeover and minimal clean up
- Disposable fluid path prevents fluid contamination during dispensing process
- Safety air relief valve to prevent over pressurization
- Comprised of aluminum with an anodized black finish
- Safe to use with light-curable materials
- Air-tight cover seal eliminates leaking points and air entrapment problems
- Cover-mounted precision air filter regulator

The Dymax bottle drop-in pressure tank is designed to accommodate fluids that are supplied in bottles/containers up to 1 gallon in size. Materials are carried through a disposable fluid path from the bottle to the dispensing valve by constant air pressure. The tank's disposable fluid path is easy to replace, allowing for easier product changeover with less clean up. A variety of different fluid path sizes and materials, including black tubing for UV applications, are compatible with the tank. The tank is constructed of aluminum with an anodized black finish and is compatible with all Dymax pneumatic dispensing valves. The cover features an air-tight seal, eliminating leaking points or air entrapment problems. A cover-mounted precision air filter regulator comes standard with the tank.

### For use with the following package sizes:

- 1 Liter bottle
- 1 Liter wide mouth
- 1 Gallon jug
