

Rod Lens Adapter Kit Installation

Some Rod Lenses require installation of an Adapter to connect an 8-mm lightguide to the Rod Lens. These instructions describe how to install the adapter kit.

1. The Kit consists of an Adapter for installation on the end of the 8-mm lightguide and a 1.5-mm hex wrench.

2. Place the adapter on the end of the 8-mm lightguide & gently tighten the setscrew.

CAUTION! Over tightening of the setscrew can damage the glass element in the end of the lightguide.

3. After the adapter is installed, insert the 8-mm lightguide into the rod lens.

4. Gently tighten the knob on the end of the rod lens to secure the 8-mm lightguide to the lens. This completes the installation.
