

BlueWave[®] 200 Version 3.0

Quick Start Instructions

1. Remove the protective cover from the Lightguide Mount.
2. Insert the large end of the Lightguide into the Lightguide Mount until it snaps into place (Figure 1). Fasten the Lightguide into place by lightly tightening the Setscrew located on the Lightguide Mount (Figure 2). A Hex Wrench is provided with the system for this purpose. The Setscrew should be tightened gently to prevent damage to the Lightguide.

NOTE: Multi-Leg Lightguides should be balanced by rotating the Lightguide to obtain the desired UV intensity of each leg before lightly tightening the Setscrew.

Figure 2. Gently Tighten Setscrew on Lightguide Mount with Hex Wrench

3. Connect the Power Cord to the Power Receptacle on the rear of the *BlueWave 200*. Plug the Power Cord into a grounded wall outlet.
4. If you will be using a Foot Pedal, connect the Foot Pedal to the Foot Pedal Connection (Figure 3) on the rear of the unit. A ground stud is also provided on the back of the *BlueWave 200* if additional grounding is desired.
5. Turn the Power Switch on (located on the rear of the unit) and press the “Bulb On” button (Figure 4). Allow the Bulb to warm up for 5 minutes.
