RE: Natural rubber products in Dymax adhesive

To Whom It May Concern;

This is in response to your inquiry regarding the presence of natural rubber in Dymax products.

After reviewing the formulation, there is no known or intentionally added natural rubber latex, dry natural rubber, synthetic latex or synthetic rubber that contains natural rubber in its mixture. Furthermore, to the best of our knowledge, the product does not come in contact with any materials or equipment that contains latex.

There may be latex in the facility used to produce our adhesive, as we are not a latex-free facility.

The information being provided regarding the substances contained in Dymax products comes after reviewing the information provided by suppliers or producers of the raw materials used in this product and understanding our production process. We have not conducted any tests on our product specific to the substances in question.

Thank you for your continued interest in Dymax products.

Sincerely,

DYMAX CORPORATION

Mark Pettegrew
Global Director, EH&S and Product Regulatory

Technical data provided is of a general nature and is based on laboratory test conditions. Dymax does not warrant the data contained in this bulletin. Any warranty applicable to the product, its application and use is strictly limited to that contained in Dymax standard Conditions of Sale. Dymax does not assume responsibility for test or performance results obtained by users. It is the user's responsibility to determine the suitability for the product application and purposes and the suitability for use in the user's intended manufacturing apparatus and methods. The user should adopt such precautions and use guidelines as may be reasonably advisable or necessary for the protection of property and persons. Nothing in this communication shall act as a representation that the product use or application will not infringe on a patent owned by someone other than Dymax or act as a grant of license under any Dymax Corporation Patent. Dymax recommends that each user adequately test its proposed use and application before actual repetitive use, using the data in this communication as a general guideline.
